

What Are You Working On?

We want to hear about your ► Technologies • Research • Achievements

Whatever you're developing...

- Sensors
- Processes
- Algorithms
- Simulations
- Instrumentation
- Apps & Software
- Testing Set-Ups
- Acquisition Boxes
- Data Recorders
- Flight Maneuvers
- Flight Test Techniques

We can help you with ► Funding • Collaboration • Dissemination • Recognition

The **Center Chief Technologist (CCT)** is leading several efforts to highlight the work being done at **Armstrong Flight Research Center**. Let us know what you are working on so the CCT can:

- **Identify potential funding opportunities** to enable further research and development
- **Feature the center's work** in a new "AFRC Research, Technology, and Engineering Highlights" video; the *Research, Technology, and Engineering* report; awards; *NASA TechBriefs*; and other opportunities to demonstrate the value of your work
- **Facilitate collaborations** with research partners
- **Document your innovations** in TechPort, a comprehensive resource for the public to locate information about NASA-funded technology development activities

Deadline: May 15, 2015

It only takes 5 minutes

Visit
http://bit.ly/afrc_whatwedo
 and complete the form.

It's just a few short fields, and you're welcome to attach other documents you have handy.
